

Method Statement

▲ Read the safety information overleaf

- 1. Cut a slot into the horizontal mortar joint using a wall chaser
- 2. Clean the slot with a vacuum and thoroughly flush with water
- 3. Using the Bond Flex gun kit, insert a 10 mm depth bead of Bond Flex into the back of the slot
- 4. Using the finger trowel, push the Bar Flex into the bead of Bond Flex, ensuring good even coverage
- 5. Repeat steps 3-4 with a second bead of Bond Flex and second Bar Flex
- 6. Insert a final bead of Bond Flex over the exposed Bar Flex and iron into the slot using a finger trowel
- 7. Re-point or fill the joint and leave ready for any decoration

Guidelines

- A. Depth of slot is between 55 mm and 70 mm
- B. Bar Flex to extend a minimum of 500 mm each side of the opening
- C. Where Bar Flex is joined for long runs, a minimum of 500 mm overlap should be allowed
